Grouping Logic

2nd Round Research Playback

Presented: March 19, 2024

Mike, Yoomi

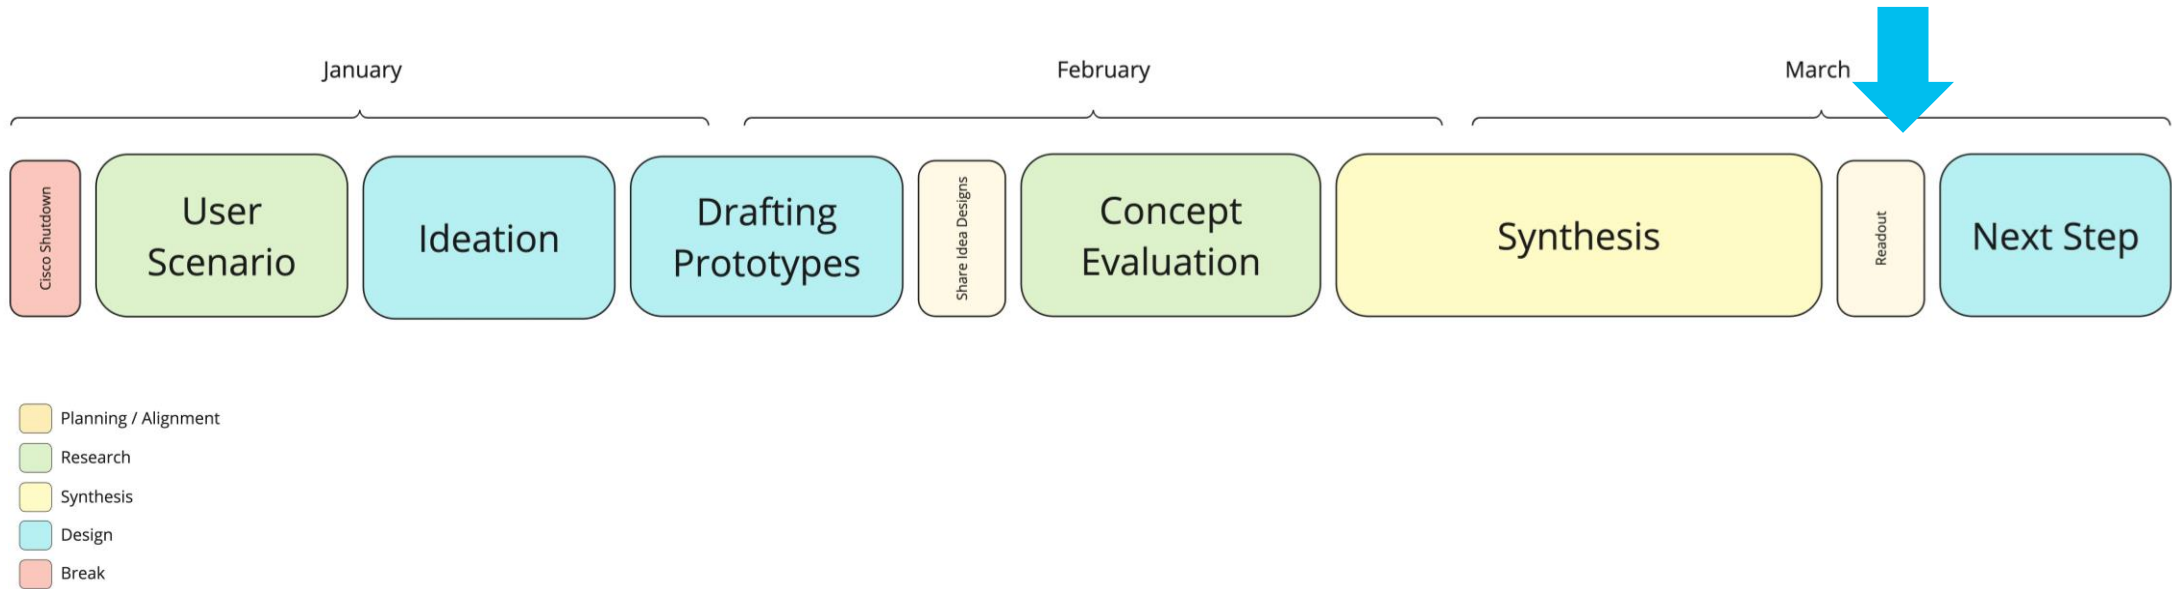

Agenda

- 01 Summary
Our objectives and approach
- 02 Findings & Recommendations
What we learned and how we plan to use it
- 03 Next Steps
Our next steps and how we want to work with the team
- 04 Appendix
Further research findings

Summary

Timeline / Schedule

Next Steps:

LTD Team Internal – Keep Working on Research/Design (ex. User Needs Statements, Journey Map)

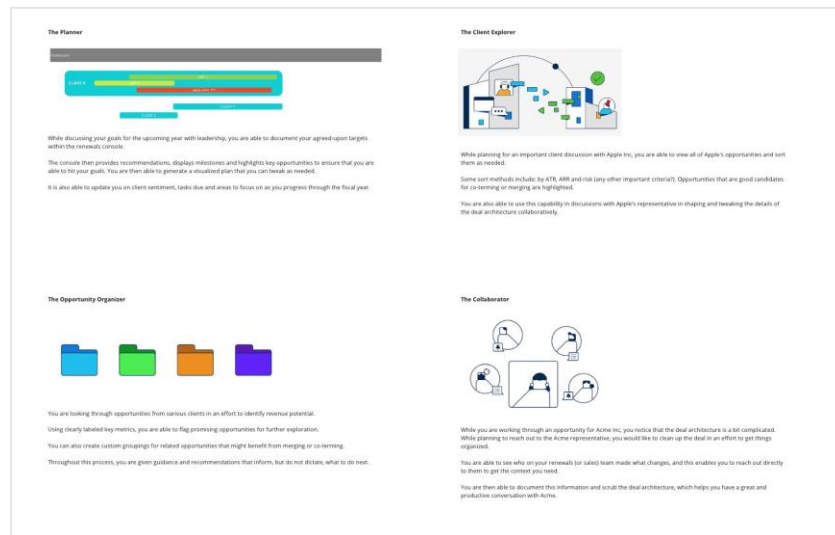

LTD Team External - Long-term Goal with Dev/Business/Product team

1st Round of Research Summary

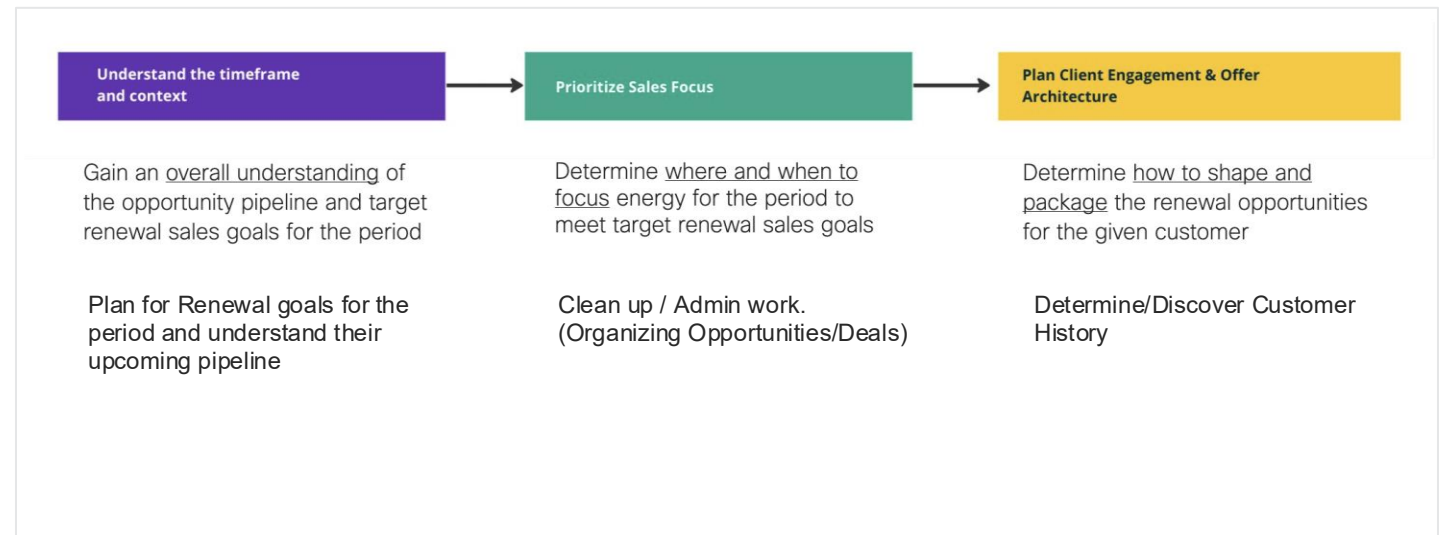

We interviewed **10 SMEs** (Subject Matter Experts) to understand how users plan, prioritize, and manage opportunities as part of their overall workflow.

After the SME interviews, we interviewed **13 users** (Renewal Managers, Renewal Specialists, and Renewal Leaders) with the 4 possible future states to confirm users' workflow. We framed the overall Renewal Sellers' Workflow in 3 phases.

4 Possible Hypothesized Future States

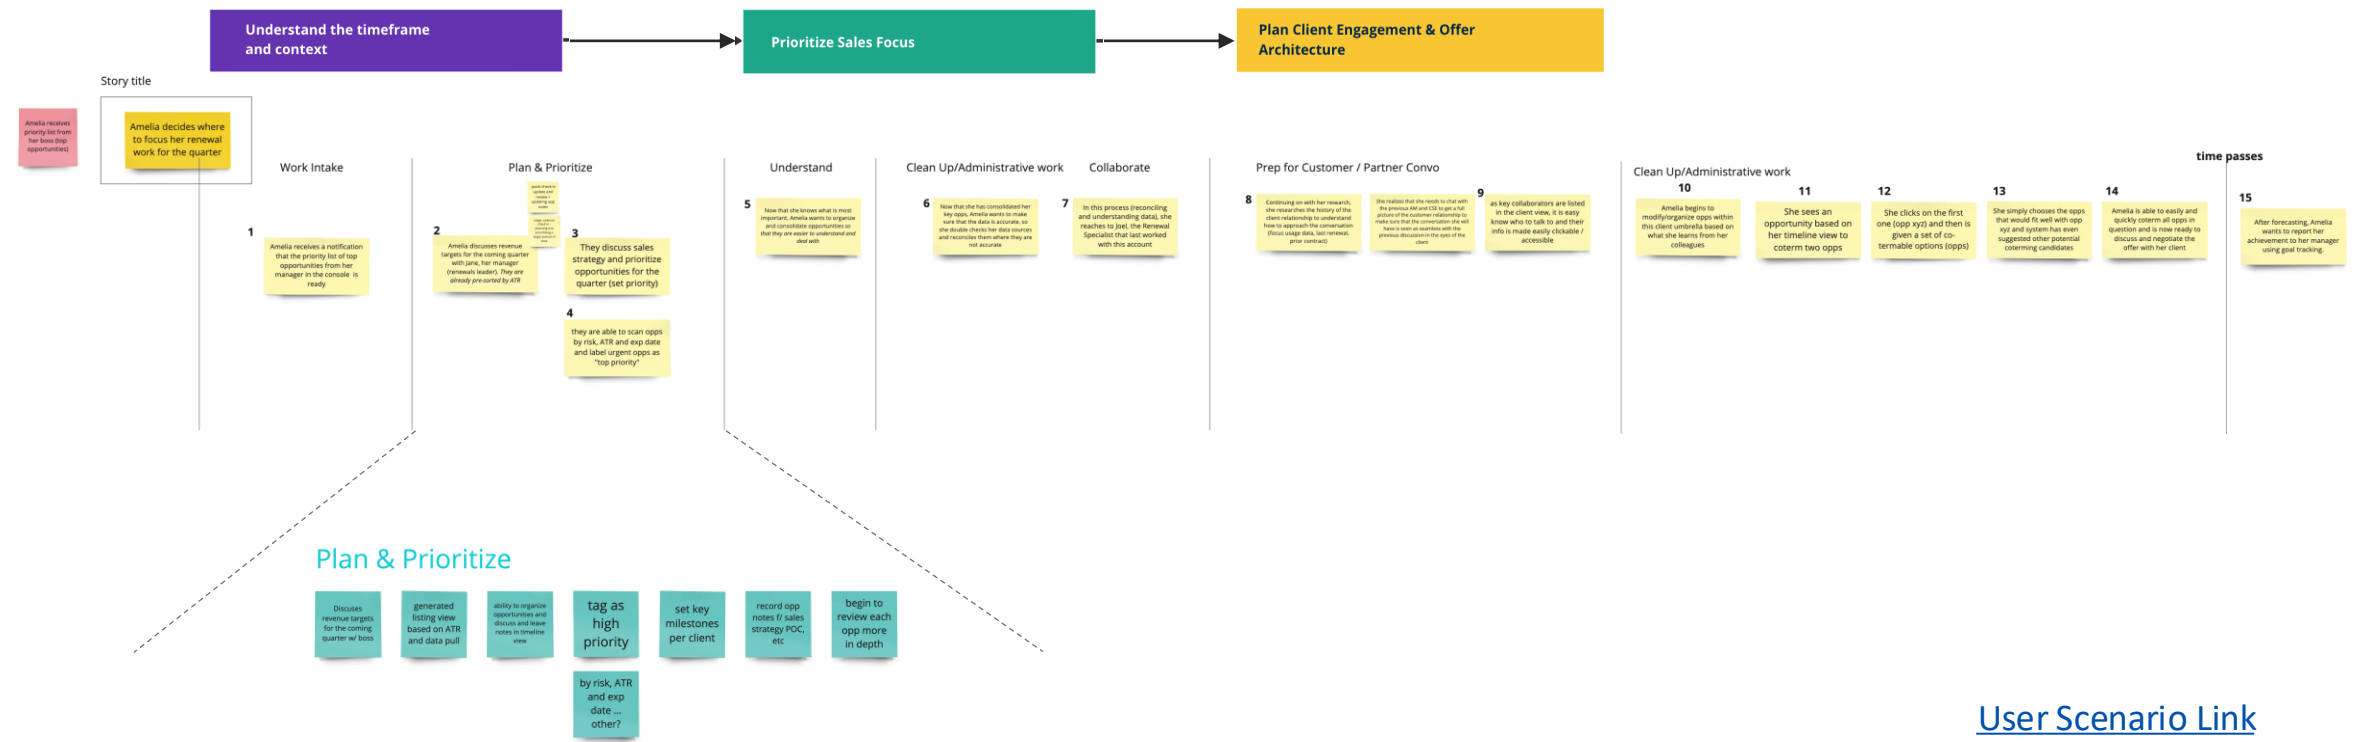

Our understanding of the Renewal Sellers Workflow

2nd Round Research: User Scenario

Based on are three Renewal Sellers Workflow, we specified a more detailed user scenario. We used the Renewal Manager persona, Amelia. And we detailed more on the plan and prioritize to get more ideas for the concept designs.

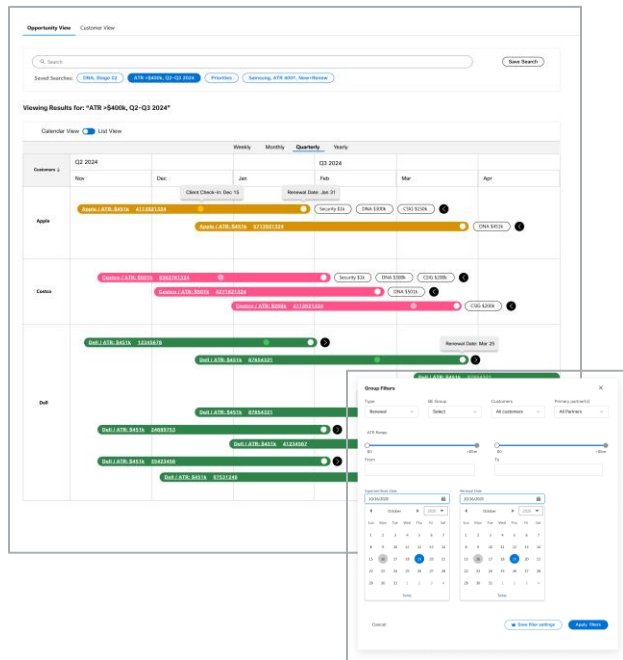

2nd Round Research: Ideation Sessions

Understand the timeframe
and context

Prioritize Sales Focus

Plan Client Engagement & Offer
Architecture

Timeline View

Our Hypothesis

Users might start their work by searching for opportunities and want to see their results in visualized ways to understand their timelines/opportunities easily.

Ideas to Validate

- Saved search (Custom search)
- Timeline view
- Opportunity grouped view
- Visualized milestones
- Summary of the ATR amount of the architecture next to the opportunity line
- Toggle to see list view

List View

Our Hypothesis

Users might want to see the key metrics and manage opportunity efficiently.

Ideas to Validate

- Key metrics (Table Columns)
- Tags, Tag management
- Notes
- 'Opportunity Actions' button: providing actions related to opportunity mgmt

The screenshot displays the 'Opportunity View' in a CRM system. At the top, there's a search bar and filters for 'DNA, Stage 02', 'ATR >\$400k, Q2-Q3 2024', 'Priorities', and 'Samsung, ATR 400+, New+Renew'. Below this, a table lists 7 items selected, with columns for Opportunity Name, Tag, Note, Deal ID, Customer, ATR, TCV, EXR date, and Stage. A 'Merge' dropdown menu is open over the table, showing options: Merge, Split, and Link.

Below the main view, there's a modal titled 'Add to Group'. It has two tabs: 'Add to existing group' and 'Create a new group'. The 'Create a new group' tab is active, showing a form with fields for 'Group Name' (G_RNW-Co-Term_Group), 'Expected Book Date' (8/20/2023), and 'Opportunity Notes'. There's also a 'Current Tag' dropdown set to 'Co-Term' and an 'Add Tag(s)' input field. Buttons for 'Cancel' and 'Create a Group' are at the bottom.

Grouping Feature

Our Hypothesis

Users might want to manage one parent/uber opportunity including all the related sub/child opportunities to save their time.

Ideas to Validate

- Group function
- 'Create a new group' matrixes
- Grouped opportunities (bulk or multiple actions)

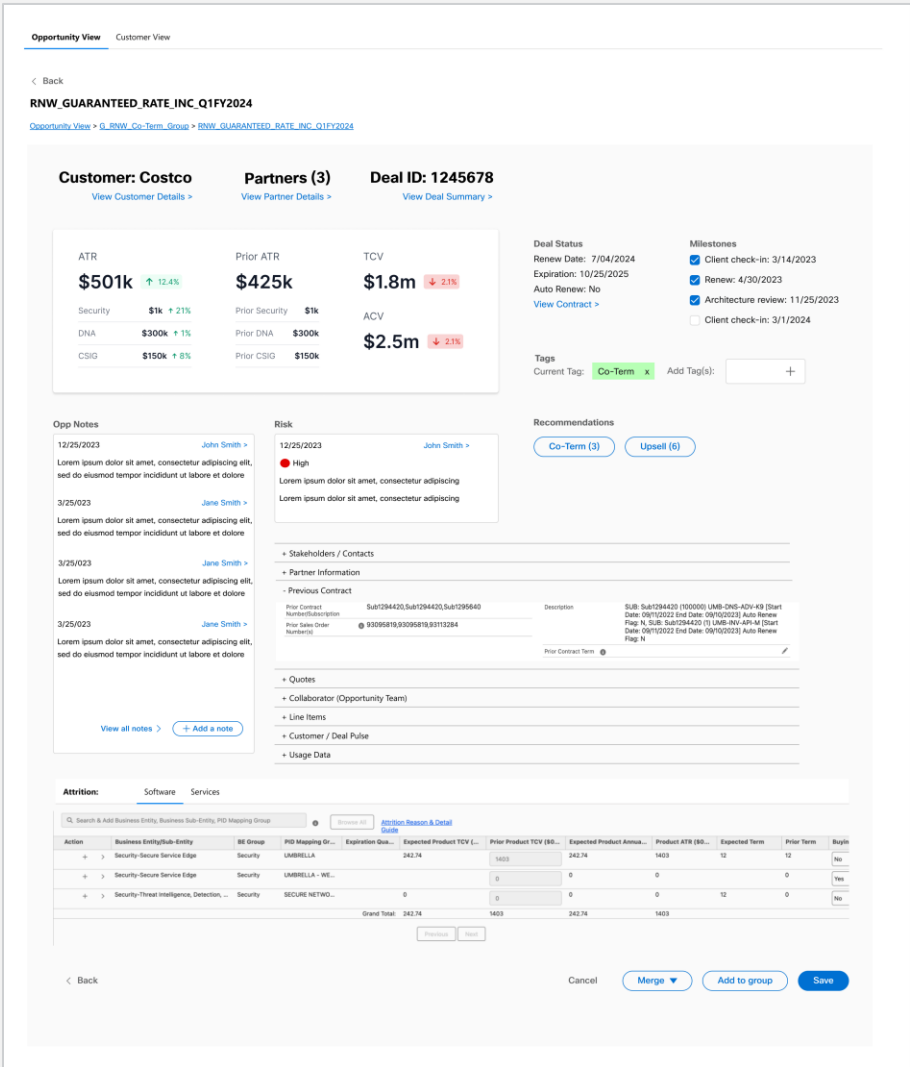

Opportunity Detail View

Our Hypothesis

Users might want to see detail opportunity information at glance.

Ideas to Validate

- Detail Information in one page (Necessary information will be expanded.)
- Important numbers are located in the top.
- User can edit information or leads to the editable page.
- Providing recommendations function

2nd Round Research: Concept Evaluation

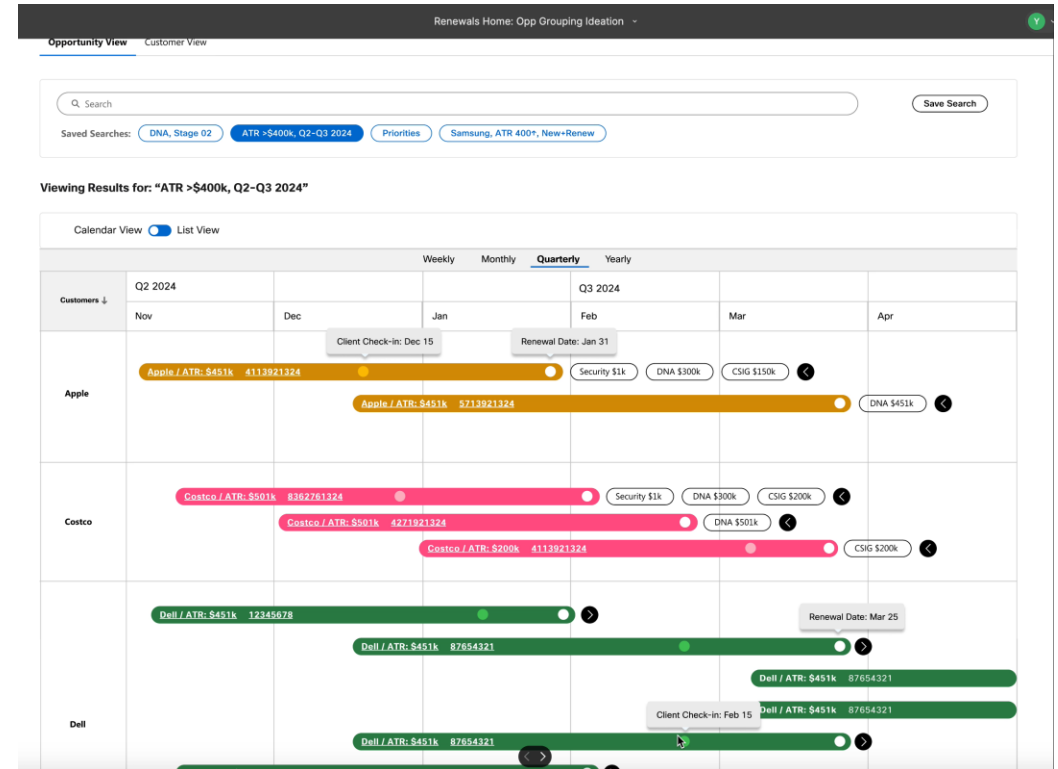

Methodology

45 mins of concept evaluation: we walked through the concept prototype and gathered users' feedback on each screen.

The research moderator shared the prototype screen and asked open-ended questions to users to validate our hypotheses.

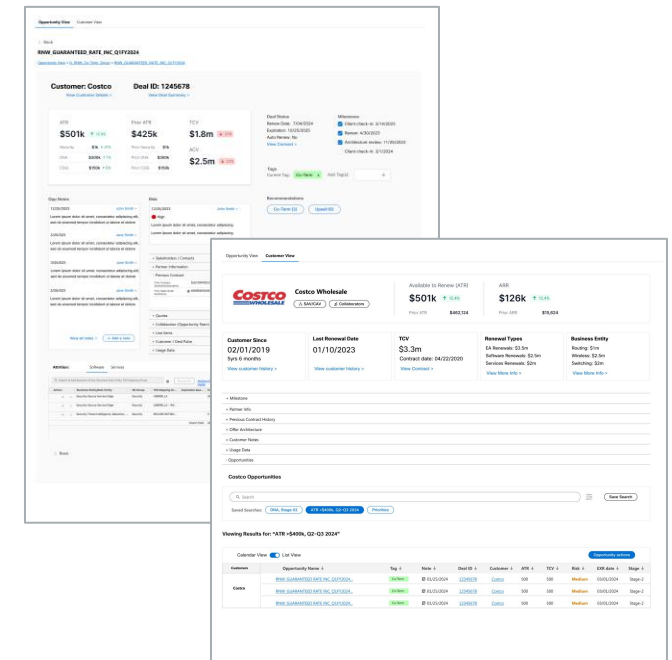

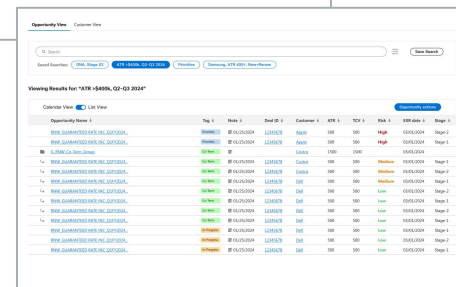

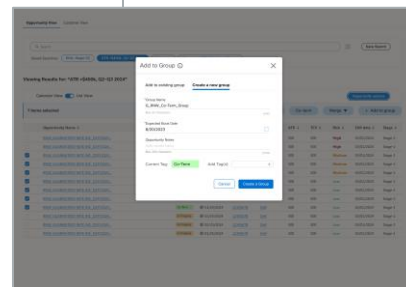

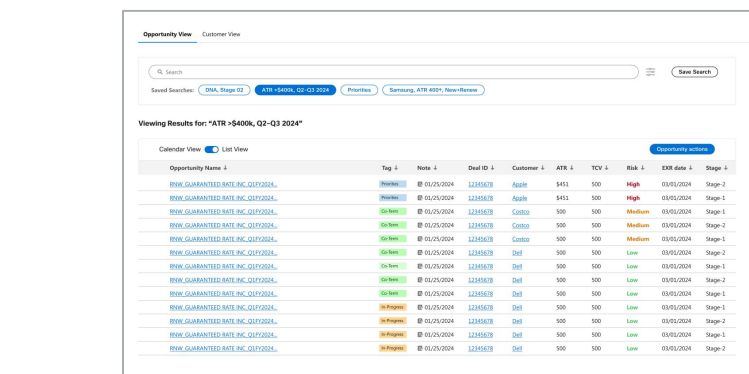

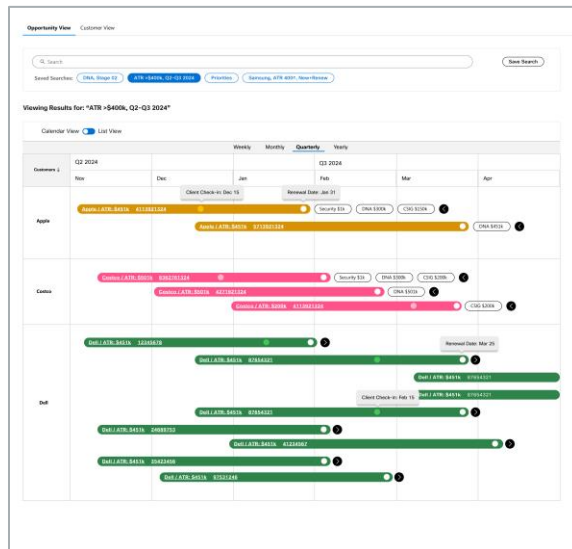

We spoke with:

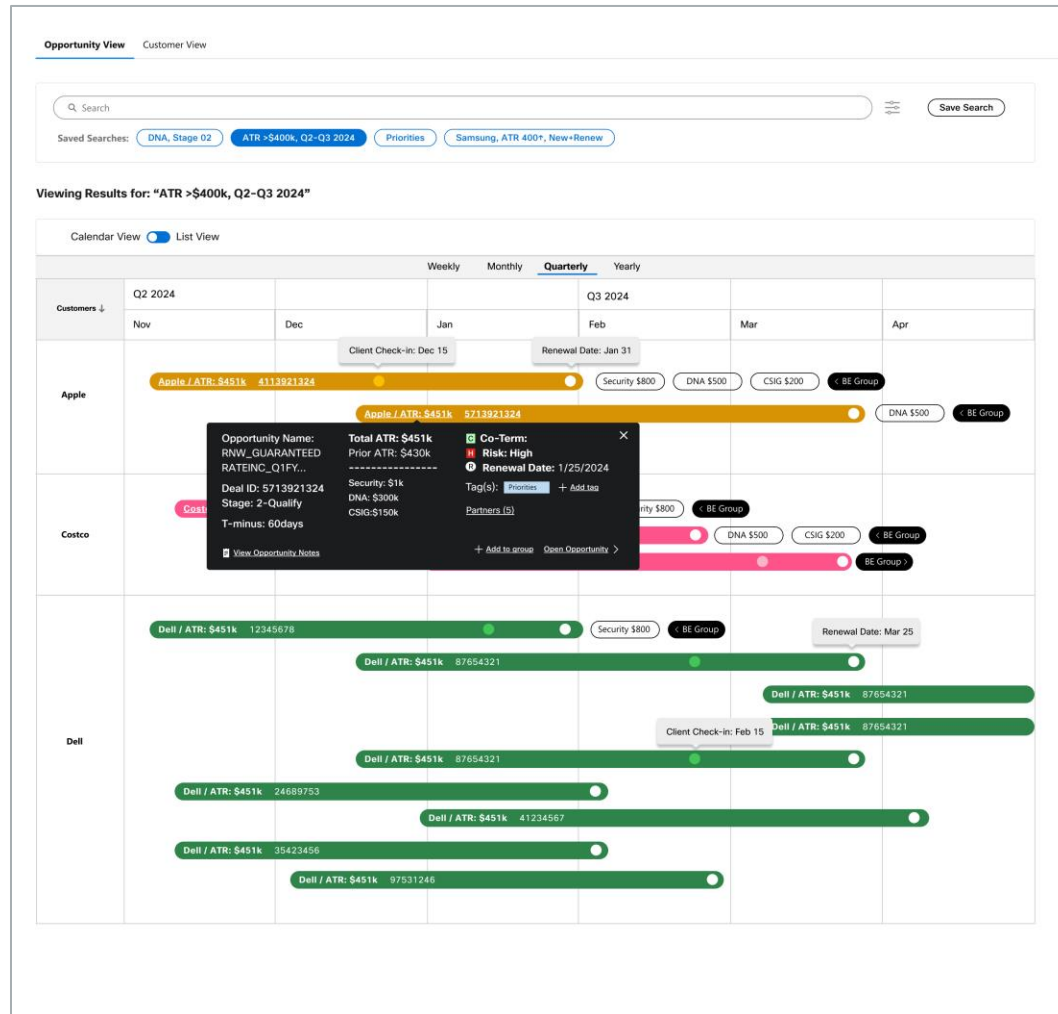

- 11 Users:
 - 5 Renewals Managers
 - 5 Renewals Specialists
 - 1 Renewals Leaders
 - User Breakdown information is attached in the Appendix.

Findings & Recommendations

Screens / Based on Current Workflow

Timeline View

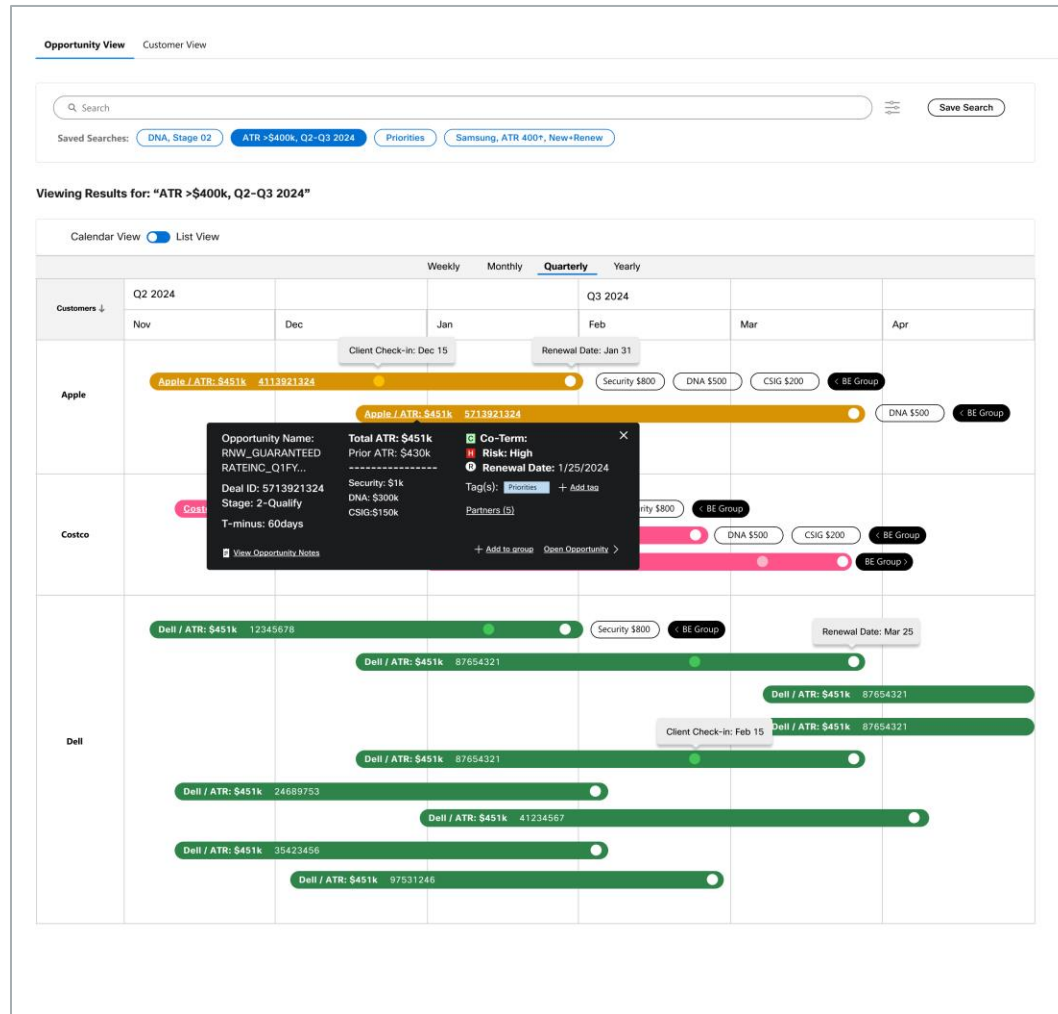

Initial User Thoughts:

- Simple visual way to understand data
- Some confusion around timeline elements (Color lines, Architecture pills & Milestones)
- May not be the best for day-to-day working
- Reporting tool and conversations w/ leadership
- Customer strategy and help highlight top opportunities

User Ideas / Suggestions:

Want more info at this level with clear actions

"In the past, when opportunities were NOT automatically created, I had like 50 to 100 opportunities/deals, **now I have thousands.**"

Timeline View

"I have a **boat load of opportunities** that the system generates... that's why I need a spreadsheet to help me organize by dollar and customer. That's how I work my accounts."

"I have in my head when my deals are running out, but **this helps me visualize it.**"

"Currently I have to do manual work in excel, but if I do this **it's clearer when deals will renew.**"

"I want to have visibility to what my customers have & need to be able to properly guide them. Think **Beyond Ready**, I DON'T have access to that tool, but If I did that would greatly help me with customer conversations."

"I need to see where I'm on fire. in a more visual representation."

Timeline View

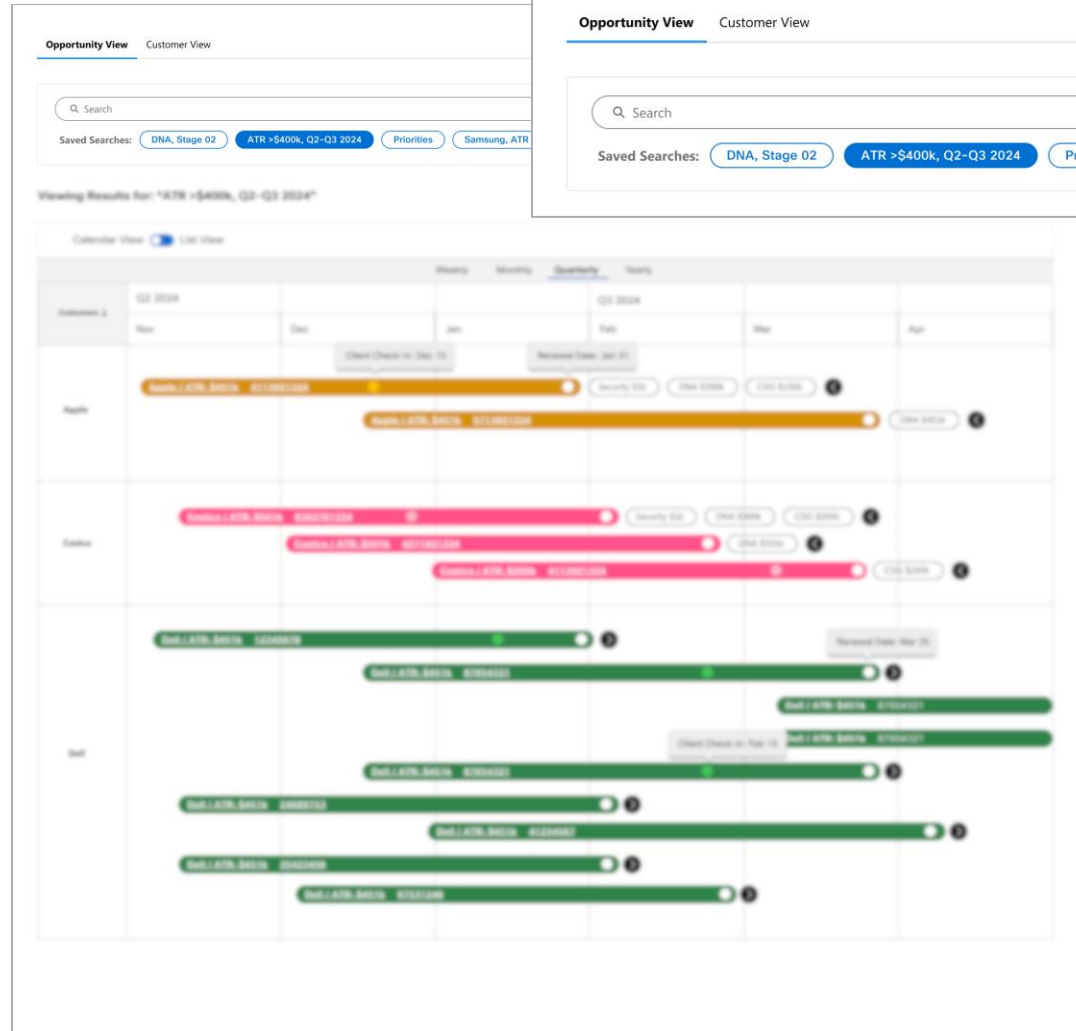

User Ideas / Suggestions:

One participant ideated with us in response to the visual timeline view that we showed him.

"Taking inspiration from the color-coding idea from the timeline. A visual way to show what opp/deals needs action."

"Make it **easier on the eyes** and help me be on top of critical deals & facilitate conversations with management."

“Having more **filters and flexibility** in the search feature would improve the usability of the platform and **increase the efficiency** of how I work.”

Saved Search Feature

Initial User Thoughts:

- Having a **saved search or advanced filter options** to control what was displayed would add tons of value.
- Want to be able to **customize** how they save searches and/or filter results that work with the way that they work today.

User Needs Statement

Both RM/RS's need a way to quickly visualize which deals/opportunities need their immediate attention and which ones have potential to make more revenue, in order to make their renewal goals and have productive conversations w/ management and their customers.

"A list view that includes contract numbers and expiration dates, would greatly improve efficiency."

"I would still look for the good old export button and work in excel."

List View

Initial User Thoughts:

- List view is how users typically work
- Tagging feature and sort by the last note date was said to be highly beneficial.

User Ideas / Suggestions:

- Customizable columns w/ ability to add columns.
- Export the data and work w/ with the data in excel.
- Partner info, Commit vs Upside, Architecture Type, Expected Book Date and Contract Numbers were among the top info that users stated that they would want to see.

Tagging Feature

Initial User Thoughts:

Users would prefer to define the tags themselves to help them organize their opportunities/deals.

User Workarounds:

Today users add descriptive text and hints to the opportunity name to help them organize and find the correct opportunities that they want to work and consolidate.

User Ideas / Suggestions:

- Ability to update tag directly on this page
- One use case for tagging could be if you had multiple partners in a bidding war, you could label an opportunity as 'Bid' to help you stay on track with what is going on with your deals/opportunities.
- Maybe tagging could be used as a simple mark that the opportunity was updated by someone.

"I really like the Tag idea. Today I have to add info to the opportunity name to help me find what I need."

"I could see using tags to help organize my opportunities."

"Yes, please. I'm an early adopter of merge/split. **More bulk edit capabilities would make my work much more efficient.**"

"Today, **we can't 'unmerge' and splitting is a nightmare.** You have to go one-by-one to split everything up."

Opportunity Actions (*Bulk Edit*) Feature

Initial User Thoughts:

- Great value in bulk edit, although some were confused by the differences between merge, split and link.
- Today, Renewal Sellers use the merge feature when trying to consolidate opportunities, but there is no 'un-merge' feature, they have to go one-by-one and split the merged opportunities.

User Ideas / Suggestions:

- Users want the option to bulk edit data that they have to repeatedly change in multiple opportunities. Some examples are notes, expected book date, expiration date and attrition reasons.
- Less features and terms that we have keep up with.

"I probably don't use 50 percent of the features; I would never get my work done if I had to do every included feature."

The screenshot shows a CRM interface with a search bar and filters. Below the search bar, there's a section titled "Viewing Results for: 'ATR >\$400k, Q2-Q3 2024'". It includes a toggle for "Calendar View" and "List View". The main table lists opportunities with columns for Opportunity Name, Tag, Note, and Deal ID. A modal titled "Add to Group" is open, showing options to "Add to existing group" or "Create a new group". The "Create a new group" section has fields for "Group Name" (G_RNW_Co-Term_Group), "Expected Book Date" (8/20/2023), and "Opportunity Notes". It also shows the "Current Tag" as "Co-Term" and a button to "Create a Group".

Grouping Feature

Initial User Thoughts:

At first users didn't see how grouping would be beneficial (many said that they would just 'merge'), but as we discussed it more many time saving use cases came to mind for Renewal Sellers.

User Ideas / Suggestions:

- Group opportunities together that may add up to an **EA deal** across multiple architectures and then sharing that group with an AM.
- Using grouping as a way to 'bulk edit' opportunities.
- Grouping could help with organization and keeping track of more complicated deals that need to be shared across multiple teams.
- Ability to create a group, then easily download all of the assets and info with one button from that group.

"If you could send a group over to CCW-R to get quoted and co-termed straight from this view that would be really beneficial."

Talking about grouping: "I have not been so excited about something, since I first saw merge. My life before merge was miserable."."

User Needs Statement

Renewal Sellers need a way to **streamline** their **day-to-day** work when using dashboards in order to **spend less time** within the tools **manually manipulating and verifying** data and have **more time in front of their customers.**

Initial User Thoughts:

- Users appreciated the consolidated view, and being able to edit straight from this page, w/o having to click around in SFDC & having multiple tabs open to get the same info.
- Having the quick visual of the ATR directionality and being able to compare ATR w/ prior ATR was beneficial to users.

User Ideas / Suggestions:

- Want the ability to download asset lists and export info.
- A feed to our CCW-R system that would tell us if it has booked. real-time info that could help keep our actions on this one tool.
- Option to click into an area and get more detailed, editable info.

“The tools themselves, I don't think there's anything wrong with them, but over time we have **been burned enough times with the inaccuracy of the data, it's become automatic that we don't trust the data until we validate it.**”

Customer Overview Page

Initial User Thoughts:

- Good when talking with management or during forecast calls
- More for management or AM's that need a more wholistic view
- Renewal Sellers have interlock calls - whole CX team together to discuss strategy for the whole customer. This would be hugely beneficial but would only use it once per quarter.

User Ideas / Suggestions:

- Users want more clear, actionable items that can be taken straight from these consolidated views.

"The top half of the page provides 80-90% of the information needed for an interlock call and is valuable in terms of total contract value and renewal types.."

User Needs Statement

Renewal Sellers need a way to **trust** that information that is put in front of them is **accurate and up-to-date** and have **clear actions** that they need to take in order to meet their renewal goals as they continue to **serve their customers**.

Next Steps

Next Steps

We would like to partner with you all to **help shape what the MVP roadmap** and **possible future state** could look like.

- Finish writing **User Needs Statements (End of Next Week)**.
- Create **as-is & to-be Journey Maps** to call attention to user pain points, highlight possible improvements and help influence the feature roadmaps.
 - Outline of both Journey Maps by **second week of April**.
- Have **Dev conversations** to see what is feasible and what is a bit more out-of-scope.
- Partnering w/ **Dev/business/product teams** to **help prioritize MVP enhancements** and possible **longer-term transformational changes**.
