

Yoomi Cha

yoomi.cha@utexas.edu | <https://www.yoomicha.com>

Professional Summary

UX/Product Designer with **10+ years of experience leading complex enterprise and AI-driven UX projects end-to-end** for global leaders like Cisco and Samsung. I specialize in making **complex technology feel simple, intuitive, and deeply human, with a relentless focus on clarity and craft**. Proven track record of driving collaborative user research, translating insights into interactive prototypes, and **holding 9 security-related patents** that demonstrate a culture of innovation. Expert in **aligning cross-functional stakeholders through strategic communication to deliver meaningful user experiences**.

Skills

UX Design & Strategy: Wireframes, Prototyping, AI UX/Interaction Design, Scalable Design Systems, Information Architecture, User Scenario, Concept Models, Use Cases

UX Research & Analysis: Usability Testing, Contextual Inquiry, Heuristic Evaluation, Affinity Diagram, A/B sorting, Behavior Analysis, Journey maps, Personas, Competitor Research, Best Practice Research

Design Tools: Figma (Figma Make), Miro, Jira Align, Confluence, Qualtrics, Adobe Creative Suite (Photoshop, Illustrator, XD, After Effects, Premiere), Sketch, InVision, Balsamiq Mockup, Google Analytics, OptimalWorkshop

Experience

Cisco/Cisco IT Team

San Jose, California

Senior Product Designer

Feb 2022 - Current

- **Enterprise Platform Simplification & Scalability:** Led UX strategy for Salesforce Renewals and New Sales Consoles, streamlining complex systems and establishing role-based data visibility to support technical scalability.

- **Cross-Functional Roadmap Execution:** Partnered with PM, Engineering, and BizOps to spearhead quarterly release cycles, aligning feature deployment directly with targeted user needs.

- **AI Product Transformation & Long-Term Strategy:** Directed AI initiatives by proposing a long-term, dashboard-driven design strategy to transition basic conversational UIs into strategic, problem-solving experiences.

- **Data-Driven Evaluation & Expected Impact:** Led usability testing and championed the integration of metric-tracking systems, with design contributions projected to support a 5% increase in Renewal ARR and save 20% of users' work time.

Cisco MFA Bypass Project

- Drove cross-functional alignment across user research, content design, and security engineering to transform a complex multi-factor authentication journey into a frictionless, secure experience, refining prototypes through continuous internal and external feedback sessions.

SFDC Renewals AI Support Project

- Led end-to-end UX design across cross-functional teams to optimize information discovery workflows, leveraging AI-guided prompts and Cisco's design system to build interactive prototypes that reduced user cognitive load
- Delivered compelling stakeholder presentations and iterated interface designs based on usability testing feedback.

Sales AI Assistant Proposal

- Co-conducted cross-functional workshops, brainstorming sessions, and competitive analysis to define and validate high-impact Sales AI use cases.
- Designed end-to-end UX flows and RFP-related prototypes, driving the strategic transition from a basic chat interface to an AI-powered dashboard experience.

SFDC Renewals Console / Grouping Logic / Renewal Risk Mgmt

- Transformed a fragmented requirement-gathering process into a structured project intake workflow, optimizing timeline management and increasing roadmap visibility for leadership.
- Led UX simplification and cross-system integration for Salesforce Renewal and New Sale (OneCRM) systems, establishing a cohesive enterprise design language.
- Streamlined intricate user workflows and optimized UI screens, achieving a 20% reduction in task completion time across multiple milestone-based product releases.
- Partnered with UX researchers to leverage Digital Intercepts for tracking post-launch success metrics, deriving key insights to drive continuous workflow optimization.

Poly/XD Team

Austin, Texas

User Experience Designer

Aug 2018 - Jul 2019

- **UX Optimization & IA Restructuring:** Led end-to-end user experience design for the Trio product line, successfully restructuring complex Information Architecture (IA) and delivering high-fidelity wireframes.
- **Product Launch & Cross-Functional Collaboration:** Managed embedded UI designs for video & audio conference hardware, including Trio 8300 (released in 2019). Worked closely with PMs, developers, and researchers from concept to release.
- **Data-Driven Design Validation:** Partnered with User Researchers to plan and conduct usability testing; identified critical friction points and translated insights into interactive prototypes (Sketch, InVision) to validate solutions.
- **Design System & Future Strategy:** Established a robust design asset library, including icons and visual components using Sketch, Photoshop, and Illustrator. Defined user personas and mapped task flows to suggest future conceptual design initiatives.

Samsung Techwin/Design Group

Seongnam, Korea

Senior User Experience Designer

Jan 2011 – Jun 2016

- **Led UX/GUI design for Samsung Security Manager (SSM) and 4K Fisheye Webviewer,** optimizing user workflows and driving continuous software updates.
- **Selected for the Vision Task Force** to establish cloud-based business models and flexible Information Architecture (IA) for future video surveillance markets.
- **Coordinated cross-functional alignments** with product planning and development teams to manage schedules and streamline complex product design cycles.

Patents & Awards

2025 Company-wide AI Hackathon — Top 10 Finalist | Cisco

9 Patents in Security Surveillance Monitoring Systems | Samsung Techwin

Projects

Opioid Overdose Prevention Project Feb 2018 – Jun 2018

- Accepted to UXPA Conference 2018
- Created a mobile app prototype and user scenarios based on user research

UX Research for a Dual Screen Device Jan 2018 – May 2018

- Conducted literature research for planning hand grasp and thermal usability test
- Suggested use cases, possible postures, and user scenarios

An Eye-Tracking Study of Electronic Word of Mouth (eWOM) Reading Behaviors on Mar 2017 – May 201

E-commerce Websites

- Designed and conducted an eye-tracking experiment to analyze user' review patterns that influence decision making

Education

The University of Texas at Austin Austin, TX

Master of Science in Information Studies May 2018

Specialization: UX Research, UX Design, User-Centered Design, HCI, IA, UI, Usability Testing, Prototyping, Taxonomy

Handong Global University Pohang, Korea

Bachelor of Engineering, Industrial Design, specialized in Product and Graphic Design Feb 2011
